The Place for a Pocket.

With the bell skirt the pocket has but one possible harbor, the under side of one of the upper one on the left side. Cut a silt your hand will barely go through, just well tuside the fold's edge.

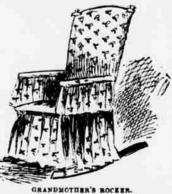

Into it sew a pocket. Fasten a tape at the upper outside corner, and tack the other end up to the skirt belt, so as to hold the pocket when in use flat between the fold's two surfaces. It must, of course, be deeply faced on both sides with the gown-stuff, albeit unless severely overloaded it is not likely to be seen.
For skirts boasting same fulness—espectally those of small and large schoolgiristhe flat pocket is the thing. Cut it in the shape shown by Fig. 2, and before sewing the two pieces together, stitch a generous square f the gown-stuff on the back side, opposite to the dotted line, which represents the open ing to be attached to the skirt.

The best place for a flat pocket is the seam behind the hip gore and back breadths, provided the cut of the skirt sets well back of the

Where the seam does not fall right, or in skirts with no seams, cut a lengthwise slit, running exactly with the threads and barely long enough to pass the hand through. Let it begin six inches below the waist-and be far enough behind the hip to be somewhat masked by the skirt's fulness.

Grandmother's Rocker.

As you look upon this picture it perhaps recalls to mind the old homestead in New Eng-land and the rocking chair in which your to last you three seasons and be made over once at least, perhaps twice; so you see if you grandmother passed so many happy hours they will be genuine antiques the third seawith her knitting and gossiping. Inclosed please find \$10 which we collected

It is a reproduction of one of the old Colodal rockers, such as may be found in many a ermont and Massachusetts garret to-day. Although simple and inexpensive it is far removed from the commonplace, and is so de lightfully comfortable and assuredly artistic that it invests with a peculiar charm almost any room in our modernhomes. It is daintily covered with chintz, dimity or other oldfashloned stuffs.

The Girl's Leather " Cinch."

One never-to-be-forgotten principle govern ing the selection of girdles is that if the walst is large a belt darker than the dress makes it seem smaller; if the waist is willowy a light or bright belt emphasizes its slender grace. And also equally important is that a wide belt and a small girth are the only combinations compatible with good taste.

A quaint conceit is that of matching the belt with shoes for outing costumes, lizard. alligator and suede being the materials usually employed. Ultra fashionables indulge in rattlesnake and pigskin for girdle and boots, Inclosed please find \$3 for the little sick and white suede, white canvas and white babies, which I got from going around to peo- patent leather will be worn.

For the Matinee.

This is a Virot matince hat. The crown and brim are in black lace over pink crape.

THE MATINEE HAT. All round projects a white lace flounce, skilfully wired to affect fanciful gofferings, pierced with pin and tied in a huge bow which rises in front of a piquet of two black ostrich tips. Large rose at the back.

cups and saucers. They are decorated in the Rose du Barri tint. Other pretty coffee cups are of a turquoise-blue color studged thickly "I wish you would get me a couple of on the outside with little points of gold and itued with gold. The snape of these is generally flared widely towards the top. A tea set which is at least novel is of dull

black china fined with pluk and decorated with a golden monogram. Almost equally odd is a set in Nile green linea with silver and bearing a sliver monogram. Some of the "I judge that you have not written much new plates are octagon-shaped and others poetry," said the editor to his caller after example the manuscript. from the circle, and when their edges are fluted they are particularly pretty. Sauce plates are made in the shape of pausies and other flat flowers. They are colored realistically and the edges curl upward.

A chocolate pot in the form of a lotus flower is a noveley. The base is of wide-open petals, which gradually become close and form the top, while the handle is of the twisted brown stem. Somewhat similar are the bonbonnieres, made, in the shape and the so much with such wretched tools," remarked coloring of a pond lily, the tinted leaves op-ning about a space in the middle, in which
